Allowable Subject Matter

Claims 1-17 allowed.

The closest relevant art is Matherne (4,840,650) wherein Matherne discloses an air purifier (10) for mounting to a leading edge of a fan ceiling comprising a self-supporting lattice framework (12) having a plurality of openings therethrough (14, 18, col. 7-16), a filter medium (20) assembled to cover the surface of framework (12), means (28) on the framework (12) for releasably mounting the assembled filter medium (20) and the framework (12) to a leading edge of a fan paddle with opposed portions (13, 15 in Figs. 5 & 6) extending outwardly in symmetrical relation. Claims 1-17 of this instant patent application differ from the disclosure of Matherne in that the air purifier has means on the framework for releasably mounting the assembled filter medium and framework to a leading edge of a fan paddle with opposed portions extending outwardly of the fan paddle in symmetrical relation thereto.
